

Key

Inundation Levels

- RL 2.5m
- RL 2.6m
- RL 2.7m
- RL 2.8m
- RL 2.9m

Flood Hazard Plan Area
 These levels relate to Flood Hazard Rule outlined in Chapter 8 Natural Hazards, Section 8.10.

Disclaimer:
 This map is an interpretation of storm surge inundation effects on land around the margins of the Tauranga Harbour. It identifies land that may be potentially at risk from harbour flooding. Details on levels are contained in two reports by Tonkin & Taylor Limited, 'Reassessment of the Tauranga District Inundation Levels' (2008) and 'Tauranga Harbour Inundation Assessment: Overland Inundation Mapping' (2009).

This Map is indicative only and should not be used in place of site specific ground or building level requirements, nor for engineering projects or any other work for which site specific investigations should be made.
